Antique Pewter Handle Set (TH138, TH139)
GENIUS Midway storage solutions

Well mountable midway storage elements that are neatly fitted to the wall or splashback. The basic element for this system is a wall hanging rail. The storage elements are easily attached either above or below the rail. These elements are simple to slot in and slide to wherever they are needed.

1. Universal Hanging Rail
   This hanging rail is simple to fix to the wall anywhere in the kitchen to provide the extra space for your kitchen accessories.

2. Hook Rail
   Great for hanging kitchen utensils.

3. Knife Block
   A safe place to store kitchen knives which are accessible.

4. Multi-Purpose Shelf
   Practical storage for cooking oil, ingredients and bottles.

5. Top Mounted Shelf
   Ideal storage for commonly used ingredients and small items.

6. Dish/Herb Pot
   A great kitchen accessory ideal for herbs and spices.

7. Kitchen Roll Holder
   An accessible place to store and dispense kitchen roll.

8. Foil Roll Holder
   The perfect accessory for any kitchen, making it much easier to access the foil and film.

9. Top Mounted Towel Rail
   An easily accessible place to store your kitchen towel.
Everything in it’s perfect place. Everything within reach. Easy to use and enjoy.

CLEVER STORAGE

Sometimes the simplest things are the most extraordinary.

Just as nature exhibits amazing efficiency among its elements, Kesseböhmer strives to achieve the perfect balance between form and function. And after 50 years, you can rest assured, they’ve figured it out. With clever storage that considers convenience for today’s multi-use kitchens as much as it considers capacity. The elegance and functionality of the Cantilever Corner, Kesseböhmer turns ordinary cabinets into extraordinary kitchens. Truly innovative designs with non-slip surfaces, transparent storage and smooth handling that deliver a level of simplicity that is naturally easy to use and enjoy.

TALL LARDER UNIT

Although we can easily go out and fetch supplies practically whenever we like by popping to the nearest supermarket or even a petrol station (at night time or late on Sundays), every household still keeps a stock of foods. Pasta, sugar, flour, rice, salt, cocoa, jam, tinned food, sauces, ketchup … are just a few examples. Even this short list is enough to explain why it is that most people end up significantly underestimating the quantity and value of their own stored foods. One of the main reasons for this is that many kitchens do not have a specific, central place for stored foods. Instead, people nearly always store food in a wide range of cupboards. And that is anything other than ideal. You lose track of everything, you waste time searching for things and many foods are simply overlooked or forgotten. This leads to unnecessary duplicate purchases and is exactly the opposite of what you want. Now, at last, there is a solution with our Tall Larder Unit!

150 PULL OUT

Good ideas fit in anywhere. Kesseböhmer creates much more than a tiny filler. When placed by the oven, the 150mm Pull-Out is the convenient solution for spices, baking trays or an indispensable towel. The high quality fitting lends even the smallest kitchen cabinets that special touch of elegance.

Recycling Waste Bins

We have a selection of bins available to solve your recycling problems. Our range of solutions makes recycling quicker and easier and what’s more all of our bins are cleverly integrated within the kitchen!

Our Kitchens include great design ideas, not just on the outside but on the inside too.

Kesseböhmer storage solutions provide stylish, practical and functional solutions providing better organised and easier access to storage space. In addition to brilliant functionality, Kesseböhmer storage solutions stand for exclusive design and a high quality finish. Internal cabinet space is used more efficiently than conventional systems, helping you get the most out of your kitchen.
Getting the lighting right in your kitchen is critical, it’s the room that attracts the most use both day and night, so creating the mood that you desire can be done with careful planning. Please consider the choice of lighting styles shown on the right.

1. **Over Cabinet**
   These lights are fantastic for pointing light down onto units, illuminating preparation and food areas, whilst also enhancing the ambiance of the kitchen.

2. **In Cabinet**
   Putting lighting in cabinets is practical when searching for stored items and decorative when you have feature glass units.

3. **Drawer**
   With an automatic switch when the pan drawer is open, this lighting solution makes it easier to find what you need and looks good at the same time.

4. **Touch Switching**
   A convenient and attractive touch sensor switch with easy on and off control.

5. **Pop-up Power**
   This allows the user to plug in any appliance and charge any USB powered devices within the convenience of the kitchen.

6. **Under Cabinet**
   Using lighting under any wall cabinet brightens up any work surface, making it easier to prepare food.

7. **Plinth**
   Plinth lighting is excellent for creating mood and ambience within the kitchen, which is especially attractive if you dine in the kitchen.

**GENIUS**

*Lighting solutions for your kitchen*

Getting the lighting right in your kitchen is critical, it’s the room that attracts the most use both day and night, so creating the mood that you desire can be done with careful planning. Please consider the choice of lighting styles shown on the right.

2. Choose your cabinet finish

Choose from a selection of 25 cabinet finishes to co-ordinate with your chosen door finish or alternatively choose your own look by using a contrasting colour. They look as good on the inside as they do on the outside.

CABINET FINISHES

White | Ivory | Light Grey | Cream | Pumice | Oak Grey | Lancaster Oak | Truffle Bardolino | Pebble | Natural Oak | Glass Light Grey | Ivory Light Grey | Oak Light | Oak Deep | Tobacco Oak | Grey Bardolino | Concrete

3. Choose your worktop finish

UrbanTop laminate worktops provide the essential combination of functional performance and creative flexibility to ensure your kitchen will look it’s best.

A fantastic alternative to natural worktops and solid surface, great looking and a hard wearing option that won’t let your kitchen design down in any way. They are stain, heat and impact resistant and available in a variety of colours and finishes to suit every taste.

WORKTOP FINISHES

Co-ordinated Worktops

Our worktop range has been carefully selected to co-ordinate with 16 of our 26 cabinet finishes. It is now possible to choose the same finish for both worktop and cabinets, producing a blended and co-ordinated design. Match your choice with a contrasting cabinet front to produce an on-trend ‘continental’ look.

5 Year Guarantee

We’re so confident that you won’t be disappointed with the quality of our worktops that they come with a 5 year guarantee!

  - Door Width 590mm
  - Door Width 840mm

- **Door Width 1100mm**
  - TH1100
  - Door Width 590mm
  - Door Width 840mm
Planning Your Space

The kitchen is the heart of every home, now used for so much more than just cooking. When you are ready to begin planning, look carefully at the available space. What shape is the room and how can you get the most out of it, taking into account all the requirements of your busy lifestyle.

Layout Considerations

Consider how you use your kitchen and what you like about it. Think about what you would change from increasing storage space to ensuring you have enough preparation area. Make a list of the things you’d like to keep and what you’d like to change. This will be useful when planning your space.

Working Zones

Most kitchens work best divided into work zones covering storage (fridge/freezer/larder), washing (sink/dishwasher) and cooking (oven/hob). The relationship between these three zones are often referred to as ‘the working triangle’ and if positioned correctly will ensure a practical and efficient layout making the kitchen a joy to use.

Measuring your space

Successful kitchen planning starts with accurate and precise measurements. Careful preparation at this stage will ensure a smooth process leading to a kitchen that will fit perfectly.

1. Start by measuring the overall length of all walls and the height from floor to ceiling and record these in millimetres on your plan.
2. Measure each window and door by detailing the floor to sill, the height and width and the distance from the ceiling and room corners remembering to include the frame.
3. Check for obstructions such as radiators, meters, extractors or ventilation grilles and detail these on the plan.
4. Note the position of any stop taps, water and gas pipes and outside drain that the waste pipe runs into.
5. Finally mark any existing power points and light switches on your plan.

Further tips

A. Splashback height
B. Hob clearances
C. Preparation spaces
D. Oven ventilation
E. Corner planning
F. Drawer options
G. Appliances
Design points to consider

- Allow sufficient space to pass comfortably between units remembering to allow for doors and drawers to open fully.
- Small filler should be planned between all walls and units allowing for uneven walls and clearance for door opening.
- Think about providing space to place hot pans onto a pan stand close to the hob.
- Plan sufficient worktop space for preparation especially in the hob and sink area.
- Place on an outside wall if possible and ensure manufacturers recommended extractor / hob clearances are maintained.
- Consider the appliances you have and any additional ones you would like to include.
- Think about drawer and pan drawer storage requirements and their location for ease of access.
- Dishwashers should be as close to the sink as possible for ease of use and plumbing.
- If possible avoid placing drawer units in corner situations.
- It is not recommended to plan ovens adjacent to walls.
- It is not recommended to plan sinks adjacent to walls.
- If possible avoid placing drawer units in corner situations.
- It is not recommended to plan ovens adjacent to walls.
- It is not recommended to plan sinks adjacent to walls.
- It is not recommended to place ovens in corner situations.

Finishing touches

Once you are happy with the overall layout consider including some additional design features such as glazed wall units or lighting to complete your kitchen.

Collect ideas for colour schemes from magazines and the internet. Make a lifestyle board to compare colours and finishes for walls, flooring and fabrics. This will help with your design.

Cabinet features

- Traditional Glue and dowel construction supplied fully assembled.
- Rigid 19mm MFC Cabinets in 26 colour options with 8mm matching backs.
- Handled cabinet units without unsightly drillings.
- Cross rail top support on all base units.
